Work Experience

SSL Wireless
(17th November 2019 – Present)
Software Associate

Here I have two core responsibilities.

First developing web application using Laravel. Currently I am developing a marketplace which will connect to an e-com site which will be developed in Magento.

Second I have been developing e-commerce application using Magento.

- Building and configuring 2x eCommerce websites.
- Coding of the Magento templates.
- Developing Magento modules in PHP using best practices.
- Designing themes and interfaces.
- Setting performance tasks and goals.
- Troubleshooting integration issues.

Regent Airways
(1st January 2019 – 13th November 2019)
Web Developer

Developing web application in **Laravel**, Already developed a Revenue Software for Revenue Team. This software is used for tracking the sales of all Agent's. The software collect data from VRS system through JS then its send the date to database through Ajax request. Revenue software system handle three types of user. It can automatically generates weekly, monthly, yearly and customize report.

Testing the API and working with the VRS COMMAND. Testing and validating work produced as part of the development process. Back end development and maintenance of websites using PHP and MySQL, Developing compatible User Interface functionality using jQuery & other libraries, Developing web sites using MySQL, PHP, JS, AJAX & other programming tools. Documenting features, technical specifications & infrastructure requirements.
